

## Sample Itinerary: Komodo

from: Labuanbajo, to: Labuanbajo

7 nights: approximately 20-22 dives

8 nights: approximately 24-26 dives

10 nights: approximately 32-34 dives

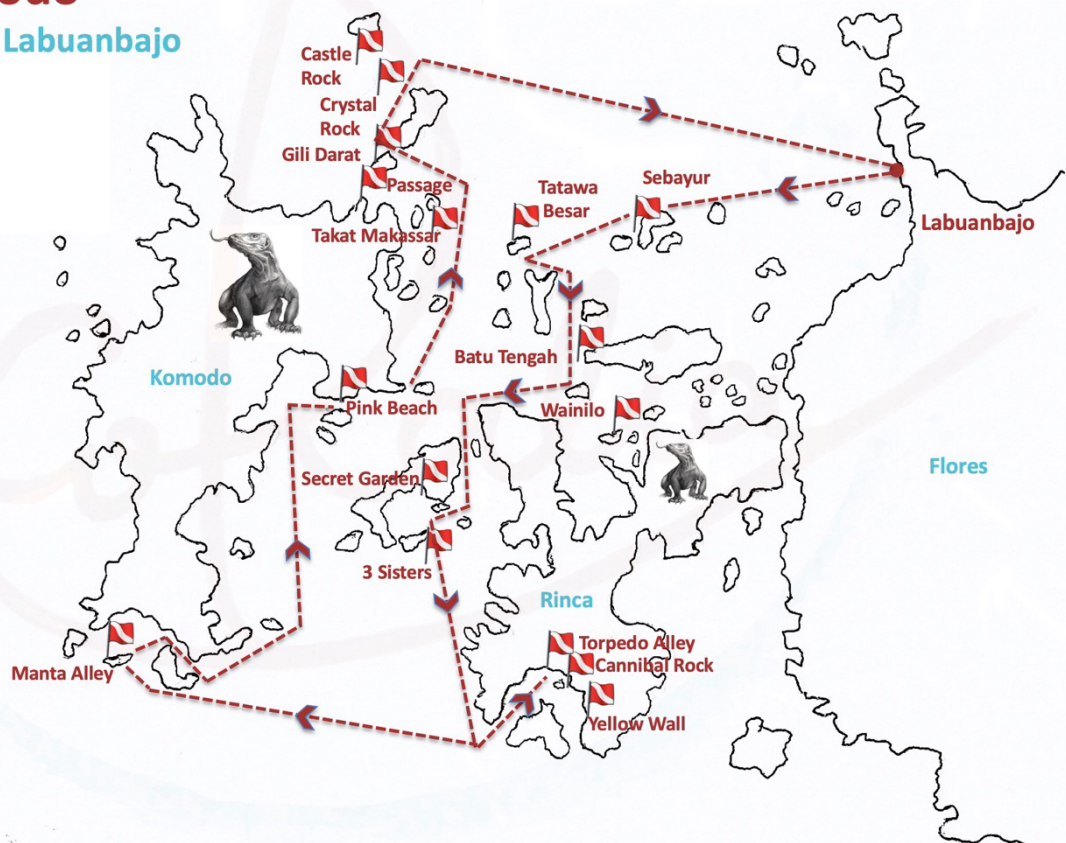

**Please note:** this is a sample itinerary that might change without further notice. Our Cruise Directors may adapt the itinerary to guarantee the best possible experience according to weather conditions or other unforeseen circumstances.

Diving in Komodo offers an exciting variety of dive sites and experiences. Komodo National Park is home to the world's largest lizard, the Komodo Dragon. This area is a World Heritage Site and one of the New 7 Wonders of Nature.

Komodo has it all! Beautiful soft coral reefs, exhilarating drift dives, spectacular hard coral reefs, fishy pinnacles and black sand muck dives. Komodo is home to a large population of manta rays, large schools of fish, turtles, reef sharks and a myriad of weird and wonderful fish and critters!

## Komodo

Labuanbajo - Labuanbajo

# Coralia Liveaboard

Starting from Labuanbajo on the island of Flores, we will do an easy check dive before heading into the large channel between the islands of Komodo and Flores, where there are colourful reefs and thrilling drift dives.

At Takat Makassar, you can drift along the bottom of the sea to look for manta rays. Tatawa Besar and Siaba Kecil have healthy reefs that are best viewed while floating along in the current. Batu Tengah lies exactly in the middle of the National Park and the healthy corals here attract all the reef fish in big numbers. For the macro lovers, we might find the very special ladybugs here.

A highlight of any visit to Komodo is to see the Dragons! There are several locations where you can see these magnificent animals. Any cruise on board Coralia will include a trek to look for Komodo Dragons. There are also a couple of viewpoints where you can take in breath-taking views across the National Park. On the day we do the Dragon trek, we will offer three dives.

Padar island has a wonderful viewpoint and long, empty beaches. There are several dive sites such as Three Sisters and Secret Garden in this area. Your dive guides will look for giant frogfish here. Keep your eyes out into the open water for schools of mobula rays.

In the south of Komodo are some world-renowned dive sites. Inside Horseshoe Bay on the south of Rinca Island, at Cannibal Rock and Yellow Wall of Texas, you will see a very different coral landscape. Crinoids and sea squirts host cute ladybugs, colourful walls are home to giant frogfish and hiding inside fire sea urchins are zebra crabs and Coleman shrimps. The Holy Grail of fish, rhinopias, have also been found in this area. Manta Alley is on the south of Komodo Island. This is another popular spot for manta rays to hang out, feed and get cleaned.

There are plenty of macro dives in Komodo too. Wainilo and Lasa are where your dive guides will look for critters that you never thought existed! Melibe nudibranchs, hairy frogfish, flamboyant cuttlefish, ghost pipefish and harlequin shrimps are some divers' favourites. Pink Beach and Torpedo Alley are both excellent dives that can be done during the day and at night.

In the north of Komodo National Park, there are pinnacles full of fish, where you can also see reef sharks, eagle rays and turtles. The two most famous dive sites are Crystal and Castle Rock. You might also dive at the fishy reefs of Shotgun and Darat Passage.

On the last full day on board, we will do two dives before heading back into Labuanbajo to enjoy our special goodbye dinner inside the harbour. The next morning, our tenders will take you back ashore to catch your flights.
